

# PCW102 PLATINUM CERAMIC SHIELD™

Platinum Professional Car Wash Systems® PCW102 Platinum Ceramic Shield™ is the first ceramic type of product developed exclusively for automatic car washes. This industry breakthrough product allows consumers to have whole vehicle ceramic protection from the ease of use of the drive through wash. The ceramic material forms a chemical bond to all exterior surfaces and creates a wear resistant coating. The treated surfaces will have increased gloss and shine along with great water beading. A touch of slickness is added to the painted surfaces to reduce the buildup of dirt, grime, bugs, and industrial fallout. Fine spray nozzles from the arch allows the product to penetrate the hardest to reach areas, including moldings, emblems, cracks, and crevices

## DIRECTIONS:

K-nozzle dilution up to 1:200 for best results. Apply PCW102 to vehicle prior to final rinse. Do not allow product to freeze. Keep cap on when not in use, to prevent premature curing of product.

## OUTSTANDING FEATURES:

- Industry breakthrough product
- Whole vehicle ceramic protection
- Easily applied from fine spray nozzles
- Increased gloss and shine
- Reduces buildup of dirt and grime
- Penetrates all surfaces for complete protection

## AVAILABLE SIZES:

- 5 Gallons
- 15 Gallons
- 30 Gallons
